

25. Public Post on HfA website:

Experienced Country Director transferred from Beta to Gamma City

Given the worsening conditions in Gamma, HfA has made the decision to transfer the Country Director of Beta to Gamma City. The Country Director has experience in a highly successful operation deploying a full surgical unit in Beta Town's rural district hospital, specializing in war surgery during the early 2020 ethnic clashes. She will now bring that experience to Gamma City, where the needs are dire.

In the meantime, the Beta Town operations will be ceased in September, with personnel transferred to Gamma City.
